Choosing to bank now means having options later

Transitioning is a complex process that can include many stressors, both external and internal. You may be asked by family and friends about your desire to have children, and you may be questioning this yourself.

Any medical transitioning, from gender affirming hormone replacement therapy to gender affirmation surgery, can lead to sterility. By banking your sperm, you are allowing yourself the option to have a biological child in the future.

The Fairfax Cryobank team is here to help.

Fairfax Cryobank has a long history of working with members of the LGBTQ+ community to build their families.
