

SPERM DONOR GENETIC TEST RESULTS Donor # 6750

DONOR CARRIER STATUS

I have received the genetic test results for this donor, and he is known to carry a mutation for the following recessive condition(s): Variant Detected for Alpha-Thalassemia (HBA1/HBA2) One copy of the alpha 3.7 duplication recommend testing egg source for HBB; Alstrom Syndrome (ALMS1); Bardet-Biedl Syndrome (BBS2-Related); Primary Hyperoxaluria, Type 3 (HOGA1)

FAIRFAX CRYOBANK HAS ADVISED ME:		
I should discuss the donor's test results with the doctor who will perform my fertility procedure, or a genetic counselor, to help me interpret the results and determine whether, and what kind of, genetic testing is appropriate for me (or my egg donor).		
If the biological parents' genetic test results indicate that they are not carriers for the same recessive condition, then the risk that the resulting child will have that condition is significantly reduced. The risk cannot be eliminated entirely, as no genetic test is 100% accurate.		
If both biological parents are carriers for the same recessive condition, then any	ACKNOWLEDGMENT	
resulting child is at increased risk for having that condition. Fairfax Cryobank strongly recommends that I (or my egg donor) have carrier testing for the genetic condition(s) listed above, which can be ordered by my doctor.		Intended Parent Initial
Genetic counseling may be available through my doctor's office. There is a list of independent genetic counselors available at www.nsgc.org .		
I have the option to seek a full refund of what I paid for vials from this donor for up to 45		

I HAVE READ AND UNDERSTOOD THIS DOCUMENT:

returned for a refund or credit.

THAVE READ AND CIVILATION THIS DOCCIVIENT.		
SIGNATURE		
Intended Parent/Client Signature	Date	
Printed Name of Intended Parent/Client		
Complete Home address	Date of Birth	

Fairfax Cryobank, Inc. must receive this completed form prior to shipping sperm from this donor.
